Your pharmacy's future starts now

Equip your pharmacy for the digitalized future while creating a unique and modern shopping experience, which results in higher customer loyalty and increased revenue while relieving the strain on your pharmacy's employees!

CareApo24 is a vending machine of the newest generation, which is integrated into your pharmacy's storefront or another location of your choice. There it acts as a 24/7 sales channel for up to 500 different product of your choice. **CareApo24** even allows for a connection to your pharmacy's robotic system.

1.

24/7 sales of goods

Round-the-clock sales with- out restrictions on opening hours! Discrete and convenient shopping experience at any given time of the day.

2.

24/7 pick-up of preordered goods

Pick-up of preordered items without dependency on opening times, e.g., on the way home from work.

3.

100% with online store and inventory management

Software for modern user experience and efficient management.

Use CareApo24 as an additional sales channel for your pharmacy and offer contactless service at any time of the day!

CREATING THE POINT-OF-NEED

Benefits for your pharmacy in detail:

Increased revenue through 24/7 availability – an automated extension of your opening hours results in higher-quality service and better availability of your offerings for your customers – convenient and contactless.

Strengthen your local positioning – Through 24/7 direct sales and order & collect – service after consultation, you can strengthen your local degree of supply – more quickly, more flexible, and more convenient than any online store!

Make use of the enormous product variability of CareApo24 – All OTC goods can be sold through **CareApo24**.

Reducing the burden on staff – Instead of making your staff perform routine tasks, self-service pickup leads to more human resources for more important activity such as consultation.

Straightforward and logical software – Due to intuitive and simple software design, your customers and staff experience a modern interface (UX, user experience) including possibilities for remote administration.

Analytics and integration – The software comes with customer analytics – your inventory system is synchronized via the pharmacy robotic system – sales data can be exported for further analysis.

Documents and compliance – The recording and documentation of all processes is fully compliant with all data protection and reporting obligations.

100% made in Austria with on-site support – We are constantly available for service and support, together with us you strengthen the local economy.
